Education

[Bachelor of Commerce](#)

Algonquin College

- CGPA 3.4/4

2019-2023

Ottawa, ON

Program-Related Skills

- Fundamentals of SAP (from Management Information Systems, ERP Business Configuration, Purchasing Management)
- Basic HTML and CSS (from E-business concepts)
- Financial and Managerial accounting (from Managerial and Financial accounting)
- Microsoft Office (PowerPoint, Word, Access, Excel)
- Business analysis tools (Visio, RACI, SWOT, Power BI, Tableau)
- Business statistics (categorical and quantitative analysis, regression analysis using excel to find correlation)
- Java (Basics of Object-Oriented programming)

Academic Projects

SAP - Used SAP to insert and alter customer orders, picking, goods Issue, Billing, Accounts receivable, and final payment. Diagnosed and corrected errors within data. Experience with IMG (Implementation Management Guide) for configuration.

Business Analysis – Analyzed an SAP consulting firms structure and recommended solutions for the Business. Performed root cause analysis, AS IS and TO BE using Visio, and a cost benefit analysis in order to create a report to present to the client.

HTML – Created three HTML desktop websites for personal use using inline CSS to demonstrate my understanding of the material learnt in E-Business.

Access database creation – Created multiple databases using tables, creating queries, and generating reports. Information to create databases were imported from excel spreadsheets. SQL and the query wizard were used to perform data analysis on employees, clients, and payments.

Excel spreadsheet – Independent project during winter break

Created a spreadsheet to be able to calculate the P/E, B/E, Market Cap, EV, and EV/EBITDA of a stock at any given time using the stock connector add-in.

Java/Python – Throughout the year I have been learning the basics of python syntax through LinkedIn learning and recreating my java projects in python.
